EXPERIENCE

Junior UI UX Designer & Product Designer

Crion Technologies, IIT-M Research Park

08/2023 - 03/2026

- Reduced work-order processing time by 75%, enhancing operator productivity by 30% through management flow redesign.
- Improved operational accuracy by 20% and log entries by 15% with a new logging and checklist system.
- Achieved an 85% increase in user satisfaction by conducting usability tests and interviews on shipped features.
- Led the end-to-end design of the CLONOS product, delivering responsive high-fidelity designs for web, tablet, and mobile platforms.
- Established a design system to standardize UI across the platform, enhancing user experience consistency.
- Pioneered AR-based SOPs and dashboards to provide real-time data access for on-site and remote operators.
- Developed VR training simulators and transformed complex EAM workflows into user-friendly wireframes and UI components.

Graduate Engineering Trainee

Praj Industries, Pune

08/2022 - 08/2023

- Improved safety and compliance by designing 50+ industrial units on ASME standard.
- Improved design efficiency by 30% by automating workflows on projects using past design data and feedback.

FREELANCING EXPERIENCE

UI/UX Designer (Freelancer)

TechLanz

09/2025 - 11/2025 Bengaluru

Company Description

- Designed a complete e-commerce experience with a six-screen shopping and checkout flow and a nine-page marketing website, owning the visual direction from concept to launch.
- Built a scalable design system of over 30 components, standardizing UI across the product and streamlining the design-to-development handoff.
- Developed the logo and branding identity for the product launch, establishing a cohesive visual language.
- Collaborated with one other designer to produce a 25+ slide investor pitch deck that supported a successful funding round, helping the company reach its target investment.

UI/UX Designer (Freelancer)

Max 1 Motors

03/2025 - 05/2025 Dubai, United Arab Emirates

Company Description

- Led a complete 10-page website revamp for a Dubai-based car dealership, delivering fully responsive mobile and desktop designs.
- Designed car-browsing flows with full filter and sort categories tailored to UAE buyers, plus integrated EMI and loan calculators that let users estimate financing upfront and simplified the browse-to-inquiry journey.
- Delivered final designs in 8 weeks and supported the development team through handoff and QA for a further 4 weeks.

SUMMARY

Product / UI-UX Designer with 3+ years of experience across enterprise SaaS, industrial digital twins, consumer wellness, and automotive. Transitioned from mechanical engineering, bringing systems thinking and technical empathy to complex product problems. Pioneered end-to-end UX for an industrial digital-twin platform (CLONOS) at IIT-M Research Park, delivering measurable gains in operational efficiency and user satisfaction. Skilled in user research, wireframing, prototyping, design systems, and responsive design for web, tablet, and mobile. Currently pursuing an M.Des in User Experience Design

FREELANCING EXPERIENCE

Product Designer (Contractor)

Vyana Wellness

📅 11/2025 - 03/2026 📍 Dubai, United Arab Emirates

Company Description

- Led UI/UX for the MVP of a wellness service platform, designing three role-based dashboards with three distinct user flows using a service-design approach.
- Mapped end-to-end journeys for three user types: wellness hosts/service members, booking customers, and gym and service-provider partners across a single connected platform.
- Designed client management dashboards, referral systems, and customer engagement flows for the initial product release.
- Showcased the MVP to investors and VCs, contributing to stakeholder confidence in the product vision.
